### PROFESSIONAL SUMMARY

Information Science and Engineering student with hands-on experience in Python, Docker, Docker Compose, Linux, Git/GitHub, FastAPI, REST APIs, Nginx, and SQL. Experienced in building and containerizing backend and web applications, working with AI/ML and deep learning using TensorFlow, Keras, OpenCV, and ResNet50, and developing a RAG pipeline using ChromaDB and embeddings. Interested in DevOps, AI/ML, backend development, automation, and deployment, with a focus on strengthening practical skills through projects.

### TECHNICAL SKILLS

**DevOps & Infrastructure:** Docker, Docker Images, Docker Volumes, Docker Containers, Docker Compose, Networking, Nginx, Linux, Shell/Command Line

**Version Control & Tools:** Git, GitHub, VS Code, Postman

**Programming:** Python, Java, C, SQL, JavaScript

**Backend:** FastAPI, REST APIs

**Databases:** MySQL, MongoDB, ChromaDB

**AI / ML:** TensorFlow, TensorFlow.js, Keras, OpenCV, ResNet50, Embeddings, RAG

**Web:** React.js, HTML, CSS, JavaScript

### DEVOPS & BACKEND PROJECTS

**Amazon Backend API — FastAPI & Docker | Sep 2026**

- Developed a backend API using FastAPI for managing users, products, availability, orders, and order status.
- Containerized the application using Docker and Docker Compose, with environment configuration and container management.
- Technologies: Python, FastAPI, SQLAlchemy, Docker, Docker Compose

**FocusFlow — Productivity Web App with Docker & Nginx | Sep 2026**

- Developed a productivity web application with focus sessions, goals, tasks, streaks, and focus tracking.
- Containerized and deployed the application using Docker and Nginx, with persistent storage and custom networking.
- Technologies: HTML, CSS, JavaScript, Docker, Nginx

**Expense Tracker — Web Application & Docker Deployment | Sep 2026**

- Developed a responsive expense tracker for managing income, expenses, categories, dates, and summaries.
- Deployed the application using Docker and Nginx, and worked with volumes and container networking.
- Technologies: HTML, CSS, JavaScript, Docker, Nginx

**Research Paper Question Answering — RAG Pipeline | Sep 2026**

- Developed the retrieval component of a RAG pipeline using ChromaDB and embedding-based similarity search.
- Worked with document chunks, metadata, vector storage, and top-K retrieval for question answering.
- Technologies: Python, ChromaDB, Sentence Transformers, Embeddings, RAG

### AI / MACHINE LEARNING PROJECTS

**Retina-Based Disease Prediction Using Deep Learning | Jun 2026 – Present**

- Developing a deep-learning workflow for analyzing retinal fundus images and classifying patterns associated with multiple health conditions.
- Working with image preprocessing and a ResNet50-based classification model using Keras and OpenCV.
- Technologies: Python, TensorFlow, Keras, ResNet50, OpenCV

**Animal Breed Detection Using Deep Learning | Oct 2025 – Nov 2025**

- Developed a browser-based application for animal breed classification using uploaded images and live webcam input.
- Implemented real-time image classification in the browser using a trained deep-learning model.
- Technologies: Google Teachable Machine, TensorFlow.js, HTML, CSS, JavaScript

### EDUCATION

Bahubali College of Engineering, Shravanabelagola · B.E., Information Science and Engineering | 2023·2027

Times P.U. College, Channarayapatna · PUC | 2021·2023

MDRS, Guramaranahalli · 10th Standard | 2016·2021

### CERTIFICATIONS & ACHIEVEMENTS

- NPTEL — Cyber Security and Privacy
- Frontend React Development — Study Comrade
- Python for Beginners — AZ Career Link
- National-Level Ideathon Participant — Avishkar Manthan 2K25

### ADDITIONAL SKILLS

Problem Solving • Teamwork • Communication • Continuous Learning • Technical Curiosity • Multitasking
